

Edmond Agalliu

Software developer

Education

GENERAL BACHELOR

Lycée Arsonval, Tours, France

Sep 2014 - Jun 2017

Food preparation bachelor

CFA des douets, Tours, France

Sep 2017 - Jun 2018

Voluntary interrupted.

Projects

Web developer

Built my portfolio/blog. The website is under constant development. In this project I used HTML, CSS, Python, Django, Github.

Silence remover application

Built an application which removes unnecessary silence and glitches from an audio file. The application takes the sound file and outputs a file without unnecessary silence and glitches. The difficulty of this project is that silence is part of the speech. If the application removes the all the entire silence then sound becomes incomprehensible. I found a way to keep useful silence and remove unnecessary silence and glitches. I also implemented a drag and drop interface.

In this project I used python, kivy and github.

ToDo list application

In this project I built an application which saves ToDo lists with dates. The application saves the files locally in the hard disk as .txt files. I had the opportunity to practice my Java, JavaFX, Java I/O skills.

Pizzeria website

A simple website with a menu of pizzas.

In this project I used Python and Django.
